## FineMicro Secure | MAKUSTIK FM 300 µm

Gypsum fibreboard A2 Micro-perforated backing A2 s1-d0 to EN 13501-1
A2 s1-d0 to EN 13501-1
Gypsum fibreboard 16mm (weight approx. 14 kg per m²)
The carrier board is finished to the acoustic and assembly specifications.
300 µm/467,500 holes per m <sup>2</sup>
Raw clean cut or adapted to the surface all round and/or grooved in accordance with the assembly requirements
Invisible assembly thanks to edge finishing etc.

## Optimum board formats based on substrate and surface.

Further formats possible on request.

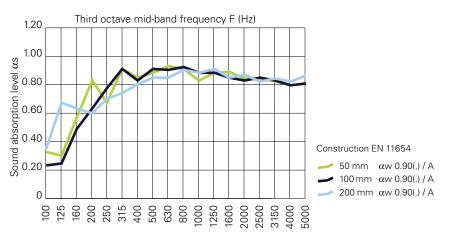

Non-flammable gypsum board widths	380/600
Non-flammable gypsum board lengths	2500/3000

Max. formats	Length	Width	Thickness
	2500	1200/optimum 600	16
	3000	1200/optimum 600	16

## Aesthetics and fire protection combined

We have developed and perfected FineMicro Secure over many years, and it is one of the leading composite fire-protection solutions on the market. All components are proven composite materials and meet the EU fire-protection standards.
